

ENVIRONMENTAL POLICY

MICROELETTICA SCIENTIFICA S.p.A., in the awareness of its own roll for the environmental protection, safety and security of its staff, committes itself to implement the principles contained in the current Policy:

I. Provide compliance with all relevant laws

MICROELETTICA SCIENTIFICA S.p.A. wants to provide compliance with all environmental legislative provision and continuous improvement of the environmental performance quality standards of its activities and processes.

II. Prevent, reduce and check the negative environmental effects of its activities

MICROELETTICA SCIENTIFICA S.p.A. is aware of the efficacy of a preventive approach to the environmental matters of its activities and products.

Therefore, MICROELETTICA SCIENTIFICA S.p.A. intends to adopt the necessary actions to check and control the consumption of resources, as well as to anticipate or to eliminate any environmentally negative effect of its activities and processes.

In cases the latter should not be achievable, MICROELETTICA SCIENTIFICA S.p.A. will aim the minimization of the waste management.

III. Innovate technologies and processes and develop environmental friendly products

The investment in all new instrument or production equipment and tools will be realized in consideration of environmental aspects to minimize the environmental impacts connected with the life cycle assessment.

Using new production technologies, MICROELETTICA SCIENTIFICA S.p.A. will prefer those that, under the same performances, generate the lower environmental effects.

The best environmental technologies will be used compatibly to its economic and financial capacity.

IV. Involve employees and suppliers

Aiming the establishment of an efficient environmental management system, MICROELETTICA SCIENTIFICA S.p.A. promotes environmental training sessions for employees, other staff members and suppliers, in order to create awareness and responsible behavior with regard to the environmental effects of their activity.

V. Inform and promote dialogue

In order to favour an open dialogue with the public and the local authorities, MICROELETTICA SCIENTIFICA S.p.A. will periodically prepare and publish information concerning the environmental effects of its activities.
